

The Asia Aviation Industry Needs You!

Do you know the booming economics of China has driven a growing need for aviation transportation? Even with the recession, China still demonstrated a GDP growth of 8% and the aviation industry having an annual growth of 15-18%.

HERE ARE THE FACTS

- ❖ China will need an average 2,500 pilots each year for the next two decades to fill the cockpits.
- ❖ China isn't the only country with pilot shortage, Airlines across East Asia and around the world are grounding flights and offering special pay packages to poach aviators from as far away as Brazil, Russia and Indonesia.
- ❖ Chinese aviation regulators say the nation will need an additional 9,000 or more pilots by 2010, as national airliners add jetliners at the rate of up to 150 a year.
- ❖ China's Big Three airlines – Air China, China Eastern and China Southern – are working hard to deal with the pilot shortages.
- ❖ Nearly 20 startup airlines wait for approval to operate, and a green light may not come soon. One reason: The startups don't have pilots.

China's airplane fleet

Chinese airlines will need nearly 3,400 new airplanes over the next 20 years. China's fleet will grow from 1,150 today to 4,460 airplanes by 2026, nearly quadrupling in size. There will be nearly 3,400 new airplanes added to the fleet, both passenger and freighter airplanes. Of these, more than 3,100 will be for growth, while 250 will be for replacement of the passenger fleet.

Commercial Pilot Jobs

Once the pilots achieved the desired minimum flight hours. They are now becoming eligible to work in several different areas of aviation. Here are a few:

Major and Regional Airlines

This has been the fastest growing segment of the airline industry for many years and still is.

Corporate

Several corporations and businesses own aircrafts to fly their executives to and from business meetings.

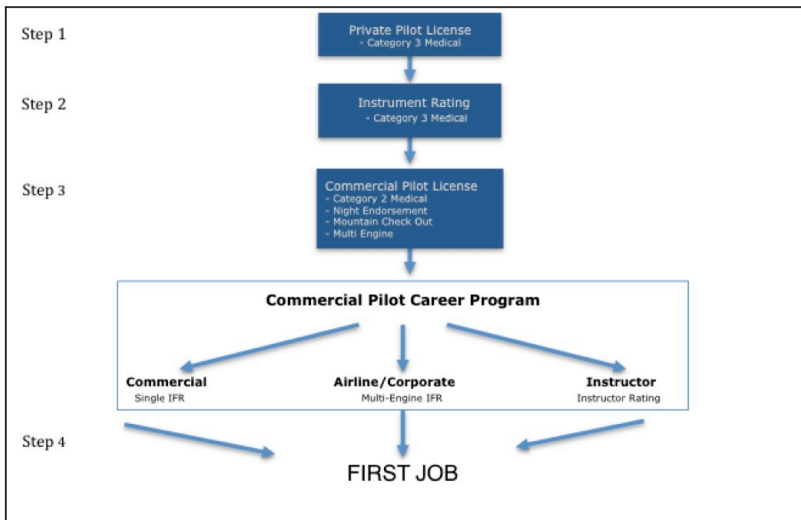

Charter/Air Taxi

It seems that each airport has a charter operation that rent out various aircraft to individuals or companies and usually supply the pilots as well.

Other Jobs in Aviation

Crop dusting, air ambulance, aircraft delivery for aircraft manufacturers, sightseeing operations, banner towing, skydiving operations, fire fighting, traffic watch, border patrol and wildlife observation.

Typical Pilot Career Path

Our student pilots at the training airport.

FLIGHT PILOT TRAINING PROGRAM

US FAA certified training programs specially designed to suit students at different stages:

Discovery Flight Program (DFP) – 5 to 10 Hr Block

No experience is required. Fly an airplane under the directions of our Certified FAA instructor

Private Pilot License (PPL) Program – 3 Months

This program is designed for individual who wishes to learn leisure flying and to obtain a FAA certified Private Pilot License that is recognized and accepted worldwide.

Commercial Pilot License (CPL) Program – 5 Months

This program is designed for individual who wishes to pursue his career as a commercial pilot.

Commercial Pilot Degree (CPD) Program – 3 to 4 Yrs

This program is designed for high school graduate who wishes to pursue his future career as a commercial pilot and to obtain a University degree to meet the basic major Airlines requirement.

Other Services

Arrangement for accommodation, meal, and insurance for students. Also, local transportation, sightseeing, and weekend activities.

ABOUT US

JetOne Academy Corporation (JetOne) has been providing flight-training services in the state of Southern California since 2003. Over the years, our trainees were almost exclusively coming from Asia. Today, our graduates are flying some of the biggest jetliners for Air Macau, China Airlines, Eva Airlines, and Hong Kong Air just to name a few. It is this paradigm shift of the burgeoning Chinese pilot industry that transforms what JetOne is today. Our expert knowledge and experience in working with the Chinese students has gained us the recognition of being one of the best in offering the flight training program in Southern California. To cope with the imminent demand for bigger and better training grounds, we have established a large network of flight training facilities that collectively can accommodate hundreds of students. This invaluable asset has enabled us to train student pilots from some of the leading Airlines, Aviation Academies and Universities in the Greater China region. We even go an extra mile to make students feel like home during their stay by arranging lodging, meal, local transportation, sightseeing, and insurance. Altogether, we have designed an extraordinary training package that truly helps eager students to learn flying. Come and let us unlock your potential to become a proud pilot joining those that are already in the air.
